About me

UX designer with 10+ years of experience bridging design and development to create scalable web experiences for creative digital marketing and corporate brand teams. I build accessible, system-driven interfaces—creating reusable design systems in Figma and translating them into maintainable CSS using techniques like CSS variables. My work blends storytelling, usability, and technical execution across marketing, B2B, and data-driven web projects.

Experience

UX/UI Designer & Developer • Western Digital 12/22 - present

- Lead UX/UI design for a user-centric Internal Digital Asset Management (DAM) tool, optimizing usability and overall user experience.
- Partner with IT teams and UI developers to translate UX concepts into production-ready interfaces, bridging design and development.
- Conduct user research and usability testing with internal DAM users, present insights to stakeholders, and collaborate with IT leadership to define a strategic, technically feasible roadmap.
- Develop and maintain scalable design systems, style guidelines, and shared Figma component libraries to support consistency and adoption across teams.
- Ensure accessibility standards (WCAG compliance) are met throughout design and development, supporting inclusive user experiences.
- Provide detailed design documentation and ongoing guidance to support UI development through implementation.
- Lead UI and visual design refreshes for marketing blog experiences, aligning with modern UX standards and corporate brand guidelines.
- Design and implement branded design tokens using CSS variables to support a cohesive, system-driven visual design.
- Design and develop experimental blog experiences featuring custom interactions and CSS animations in collaboration with Creative and Editorial teams.
- Manage WordPress plugin maintenance and codebase workflows on Pantheon, supporting stable deployments and site performance.
- Update WordPress UI and front-end code to improve usability and align with evolving brand standards.

UX/UI Designer & Developer / Senior Digital Marketing Specialist • Marsh 06/14 - 12/2022

- Developed a scalable, design-agnostic system and custom framework for Adobe Experience Manager (AEM), enabling modular design solutions.
- Collaborated with AEM developers to implement front-end architecture and ensure smooth back-end integration.
- Researched and implemented accessible front-end solutions adhering to WCAG standards and modern browser support.
- Created visual aids for AEM authoring workflows, template/page creation, and style system usage to maintain design consistency.
- Worked with cross-functional teams to optimize UX, visual design, and front-end implementation through iterative processes.
- Facilitated stakeholder workshops, translating business strategies and user goals into wireframes, components, and user journeys.
- Designed reusable patterns for site search, filtering, and contact management to ensure UX consistency.
- Collaborated with business units and analysts to create interactive data visualizations for marketing campaigns using D3.js, making complex data more accessible and engaging.
- Extended branding guidelines across all digital touchpoints, aligning information architecture, visual hierarchy, and UX.
- Managed and maintained design system libraries across global teams to ensure consistency and efficiency.
- Led UI design for dashboard analytics applications, creating scalable design libraries across global teams.
- Converted designs into web-optimized front-end code using HTML5, SCSS/CSS, JavaScript (jQuery), and Nunjucks.
- Utilized tools including Git, Bitbucket, Node.js, NPM, Apache, SVN, Gulp, Jira, Slack, Sketch, Figma, and Adobe Creative Cloud.

Digital Designer • Marsh (Contract) 11/12 - 06/14

- Designed and developed internal and external websites, landing pages, and micro-sites, ensuring alignment with brand guidelines and business objectives.
- Built modular, reusable front-end HTML components for digital content, optimizing performance and scalability.
- Delivered web-optimized imagery and digital marketing assets to managers for seamless CMS integration.
- Created responsive HTML email templates with cross-client compatibility, ensuring consistent rendering across major email clients and devices.
- Designed wireframes and high-fidelity mockups for digital products based on project specifications and user needs.

Designer • Freelance 01/06 - 08/12

- Design print and digital assets, logo and identity design & development
- Create and develop splash pages, mini-sites and UI
- Original illustration, layout and concept for marketing collateral and publications • Development and templating in HTML and CSS
- Organize online content, wireframing and design comps in Photoshop.

Clients include Kaiser Permanente, Blackboard Creative, International Museum Theatre Alliance

Storyboard Artist / Music Supervisor • Word World, Inc 08/2006 - 11/2010

- Illustrated and generated storyboards for animatics, enhancing narrative flow and visual storytelling for the editing team.
- Composed original music to support story, elevating audience engagement and emotional impact.
- Collaborated with composers to shape creative direction of soundtracks, ensuring alignment with project vision and themes.
- Designed and implemented file management systems with Production Coordinators, streamlining workflow and improving accessibility.
- Organized and managed storyboard files for production, enabling easy retrieval and team collaboration.
- Created dynamic special effects and timeline-based animations using Adobe Flash, Adobe Premiere, Final Cut Pro, and After Effects.

Tools & Tech

HTML5, SCSS/CSS, JavaScript, PHP, D3.js, jQuery, Adobe Experience Manager (AEM) 6.3+, Figma, Adobe XD, Sketch, InVision, Visual Studio Code, Sublime, Gulp, Grunt, Git, Astro, [Node.js](#), WordPress, Pantheon, Sharepoint Bitbucket, PHP, GitHub, Jira, Nunjucks, Adobe Creative Suite, Visualforce, CSS Frameworks

Education

- University of Central Florida, B.A. Art, Specialization in Traditional Animation
- METIS, Data Visualization with D3.js
- NYU SCPS, Web Development With XHTML and CSS
